

BORSIG

BORSIG Compressors. Commitment for life.

Think. Create. Change.

Hydrogen - the energy of the future - is the focus of BZM's long-standing expertise.

Key technologies for hydrogen compression have been an integral part of BZM's product portfolio for many years. Based on decades of experience, BORSIG provides the necessary machinery in a wide range of sizes and designs to meet the compression needs of hydrogen and hydrogenous gases.

As the transition to a green hydrogen industry accelerates, we are faced with a number of technical challenges that must be overcome before hydrogen can be used on the desired scale. BORSIG is at the forefront of this transition, offering tailor-made solutions in reciprocating and turbo compressor technology to ensure that we can meet all the needs of our customers.

For a deeper insight into our products and projects, we invite you to visit our website at www.borsig.de/zm.
